STATISHE SUTTOSON & CO.,

GREAT MEDICAL DISCOVERY! W 1TH such testimony, no stronger proof can be given unless it be trial of this wenderful Hampton's Vege

Unless it be trial of this wenderful Hampton's Label Tincture.

Let the afflicted read! read!

BARRELVILLE, ALLEGARY COUNTY, (Md.,)

May 4, 1852.

To Mesers. Mortimer of Mowbray:

Dans Sins: In justice to Dr. Hampton's Vegetable Tincture, I wish to inform you that I was taken sick on the 3d day of January last, with an affection of the stomach, bowels, and kidnoys. I was attended by four eminent physicians for more than two months—all to little or no effect. I had seme knowledge of the great virtue in Hampton's Tincture from one bottle which my wife had taken two years since.

since.

I came to the conclusion that I would take no more medicine from my physicians, but try the Tincture; and I am happy to inform you I had not taken it two days before I felt its powerful influence upon my stomach. I have continued esing the Tincture, and am now able to leave my room, and can eat any common diet without much inconvenience or pressure on my stomach.

The afflicted or their friends are daily visiting me, to learn of the great virtue there is in this Tincture of Hampton's.

I expect to send you several cert ficates in a few days—one especially from a young lady who has been confined to her room twelve months, with a disease of the head, affecting the brain.

do. E. W. HALL. On the permancy of the cure hear him. Still another let-ter from the above!

ter from the above!

BARRELLVILLE, ALLEGANY COUNTY, (Md.,)
October 13, 1852.

Messrs. Mortimer of Mombray:
DEAR Sins: I am happy to inform you that this day finds me in the enjoyment of good health, by the use of your Hampton's Tincture and the bicssing of God. I am enabled to pursue my daily avecations as usual, and I have a great desire that the efflicted should know the great curative powers of the Tincture.

I am, with respect, yours,
E. W. HALL.

THE ALMOST MIRACULOUS CURES made by Hamp ton's Vegetable Tincture on our most respectable citi-zens—men well known and tried—we challenge the world to show anything on record in medicine to equal it. Many hundreds who have felt its healing powers bear the same testi-

hundreds who have felt its healing powers bear the same testimony.

Messrs. Mortimer & Mowbray: Baltinore, July 6, 1°b2.

Messrs. Mortimer & Mowbray: Gouts: Last September I was attacked with crysipelns, from which a dreadful ulcer formed on my right leg. Getting better of this, last November I took a deep cold, which led to what my physician toid me was billous pleurisy, which left me with a constant, deeply-seated, and painful cough, having no rest day or night, and constantly throwing up from my lungs a thick matter. I became much emaciated, growing weaker every day, and keeping my bed the greater part of the time. My friends thought I had the consumption, and at times I was also of the same opinion. At this stage of my discase, after having tried many and various remedies, without success, a friend advised me to try DR. HAMPTON'S VEGETABLE TINGTURE, and procured me a bottle, which I now pronounce the greatest medicine I ever took. Before I had taken half the contents of one bottle I felt much improved; and now, having taken but two bottles, my cough and pains hase entirely left me, and I am enabled to attend to business. I can truly say that, with the blessing of God, I have been restored to the health I now enjoy by the use of this most invaluable medicine. Yours,

Truth stranger than Fiction!-None need despair !-A Lady's Testimony after thirty-eight years of suffering!

Were there not real virtue in this wonderful medicine, could it perform the astonishing cures made by it?

Messrs. Tyler & Adair: I have been sufflicted with Rheumatism, at times, from my twelfth year; I will be fifty years of age the 18th of this month: the attacks were at times so severe as to render me helpless; I have tried various remedies to very little effect. Last October I was attacked in my shoulders, sides, back, and hips; I could not rest, day or night; I could not move any part of my body without crying with pain; at this time I also tried many remedies, internal and external, without receiving any relief; I was at last advised to try II AMPTON'S VEGETABLE TINCTURE; before I had taken one bottle of which I felt much better, and as I continued taking it I felt strength coming into my back and limbs, and my stomach strengthened and revived every way; I have taken five bottles, and an much better than I ever expected to be. I finited to use it whenever I need it, and would recommend it to the afflicted, believing it unequalled. Yours, ELIZABETH BAGWELL.

REV. VERNON ESKRIDGE, U. S. N. REV. VERNON ESKRIDGE, U. S. N.

Mr. J. E. Bolish—Dear Sir: Whie I am in general opposed to Patent Medicines, candor compels me to state that I have great confidence in the virtues of Hampton's Vegetable Tincture. For several months past I have used it in my family, and in Byspepsia, loss of appetite, dizziness, and general deblitty, with entire success. So far as my experience extends, therefore, I take pleasure in recommending it to the afflicted as a safe and efficient remedy.

I am, respectfully, yours,

VERNON ESKRIDGE,

Chaplain in the U. S. Navy.

THE LOST SENSES: DEAFNESS AND BLIND

NESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the age, revealing the mystories of the world in which those live who have been deprived of the sense of sight or hearing. Ever since his boyhood, for more than thirty years, Dr. Kitto has passed a life of great activity as a scholar, in a state of the most intense deafness to which any living creature can be subjected. His account of hinself, and of his discriminating remarks on the condition of the blind, James Mitchell, Laura Bridgeman, and others, are repliese with prefound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

MACHINE FOR CRUSHING, GRINDING, AND

MACHINE FOR CRUSHING, GRINDING, AND PULVERIZING.

Recently Patented in this Country and Europe.

COCHRAN'S PLANOSPHERGAL QUART CRUSHING AND PULVERIZING.

MACHINES are now in daily operation for the inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled to the concideration of all parties engaged in grinding, crushing, and Pulverizing Quartz, from Ore, Zine, Copper, and Lead Ores, and all other Ores or Mineral substances.

It is the peculiar feature of the conomy of these machines that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz er other earthy matter, in proportion to the amount of weight or power applied. The carthy matter is so completely ground and pulverized, that the Gold may be easily separated, and subjected to any process of amalgamation that may be necessary.

subjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) required no Indricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being putverized. They are at once applicable for all purposes of grinding and pulverizing, from those required by the Drug gist to those of the most extensive operations in California and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, at from \$100 to \$5,000 each.

each, and are sold, with the right to use them, arrived our \$5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the top of the balls any desired amount of power may be used, from that of a

any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the cast superiority and economy of these machines over any other, for crushing, privating, or puterizing, heretofore offered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Mossre, Burr, Waterman & Co, first street south of Peck Slip Ferry, every day, from 7 to 6 a. m., and from 4 to 6 p. m. For further particulars, apply to 32 Cliff street, New York.

Mechanics, Manufacturers, and Inventors. THE Eighth Volume of the SCIENTIFIC AMERICAN
commences on the 18th of September. It is principally
devoted to the diffusion of useful practical knowledge, and
is eminently calculated to advance the great interests of
industry—Mechanical, Manufacturing and Agricultural—
the genius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and
maintains a bigh character at home and abroad.

the genius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge themselves that the future volumes shall at least equal. If not surpass their prodecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civil Engineering, Architecture, Railroads, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Steam and Gas Engines, Bollers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water Wheels, Wind and Grinding Mills' Powers, Planing Machines, Tools for Lumber, Brick Machines, Farming, Fire Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all Patents, Keviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Engiavings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which Issue weekly from the Patent Office are illustrated with Engravings in it-columns, thus making the paper a perfect Mechanical Encyclopedia for future as well as present reference.

Valuable Premiums are offered for the largest list of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Patent Agency Office, 128 Fulton street, New York.

KRAUSER'S PATENT CLOVER-SKED HARVESTER
IS BEFORE THE PUBLIC FOR THE FIRST TIME
ITS utility is beyond comparison with any other farming
implement now in use. It takes the seed from the field,
leaving the straw or grass all standing. It weights two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to twelve acres per day. The fingers, or teeth,
catch all the heads, the revolving knives cut them off and
throw them back into the box, which will cross a twentyacre field without emptying. The heads are then loaded
into a wagon and taken directly to the mill for cleaning,
thus diminishing the labor three-fourths, and saving all the
seed. This machine comes so low that every farmer will
have it, and pays the manufacturer 300 per cent.

K. WHEELER, Agent for Washington.

E. WHEELER, Agent for Washington We, the undersigned, do certify that we have seen Mr. Krauser's Patent Clover Harvester in operation, and it has given perfect eatisfaction. It has gathered many of the farmers' clover in this neighborhood—it is all that Mr. Krauser and his bills represent it to be. The farmers have given one-half for gathering and threshing.

JAMES D. TIMBERMAN, JOSEPH DEWALD, WILLIAM P. GARWOOD, JOHN F. COOK, JAMES COLLINS, JAMES B. COOK, JAMES COLLINS, CHARLES LEWIS, PETER H. JONES.

THOMAS TUMBLESON, CROSS KEYS, WASHINGTON TOWNSHIP, CAMPAN Co., N. J., )

Long-a-Coming, October 7, 1851.

This is to certify that Mr. G. J. Naylor has gathered clover off of a sixteen-acre field of raine, which has been pastured two months with ten head of eattle, and it produced six bushels and a half and one peck of seed. I gave him two-thirds for gathering and cleaning. I think his machine is first-rate, and answers all the purpose that is intended.

NEHEMIAH NICHOLSON.

The following points out the profitable nature of the Harvester:

Harvester: KRAUSER'S PATENT CLOVER-SEED HARVESTER. 

. 150

have found them to agree unanimously with the affore calculation.

Perhaps no invention offers greater inducements for a
profitable investment than the Harvester. For an enterprising young man, of good business habits, a large sum of
money could without doubt be realized from the sale of
rights in the different States of the Union not yet disposed
of. By calling at this office, it can be demonstrated satisfactorily that men of moderate capital could not choose a better
or more money paying business.

Those who wish to see a model of this celebrated farming
implement, and the satisfactory manner in which it operates,
can do so by calling at

E. WHEELER'S,
Opposite Browns' Hotel.

N. B.—The subscriber has purchased the right for Montgomery county, Maryland.

HARRIS & GRIPVIN

DISCOVERED AT LAST! M. SCHLESSINGER has invented a Metallic Pen which supplies a want long existing. It is coated with gutta percha, and most effectually resists the corrosive properties of the Ink, and, being pointed with platine, has all the flexibility and smoothness so desirable in writing. It is equal in all respects to the most highly finished diamond-pointed gold pens, and is to be had at a price so reasonable that it must come into universal use.

This highly useful and desirable pen has been tested already in this city in engrossiog on parchment, and in the ordinary business writings, and its superiority is fully admitted.

mitted.

I HIS rare and valuable Coal is a variety as changed into an anthracite, and it has only b Tills rare and valuable Coal is a variety not quite changed into an authracite, and it has only been discovered (is large quantities) at three places upon our globe, viz: at South Wales, Great Britain; at Donets, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the highest price. It is now mined upon the large estate (45,000 acress) of the Dauphin and Susquehanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the coal of any other region. For easy ignition, durability of fire, complete combustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is the near coal in the world. It has the inflammability of the bituninous coal, with the cleanliness of the anthracite, and a greater durability than either. It burns without making any scot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consumed. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is no weate, for the small coals made by handling, burn as well as ordinary coal. All hould be burned together. If screeped at all the dust only should be burned together. If screeped at all the dust only should be taken out.

by handling, burn as well as ordinary coal. All rhould be burned together. If screened at all the dust only should be taken out.

A very erroneous impression exists with many persons that the heartical coals are the most e-onomical for ordinary purposes. This might be the case if coals were rold by measurement, but never when they are sold by weater. In Taylor's valuable work, (Statistics of Coal,) the details are given to show that 31 pounds of a free burning red ash yielded more heat to a room in 16 hours, than 37 pounds of a heavy white ash coal, making the red ust, at \$5.50, to be more economical than the white ash at \$4.61 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a free made of sessoned hickory or oak wood, and it would be equally as absurd to apply a blast constantly to a free-burning coal. But the heavy white sah anthracites cannot be burnt without a powerful draft, and without using a larger quantity of eoal than the temperature of the weather sometimes requires. Various patterns of stoves, franaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In every contrivance, however, which has been invented to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stoves when this coal is used. The draft slone is to be regulated by a damper. In introducing this new coal for the &rt time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free-burning red ash ve

to the District of Columbia, and it can be obtained at retail from the following persons:

Wm. T. Dove, Washington.
F. Magruder,
do Myers & Baker, Georgetown.
Orders for this coal by the cargo, as well as for the sonituminous and anthractic coals, mined by the Dauphin and Susquehanna Coal Company, will be promptly executed by ADAMS FOSTER, Agent,
Office southwest corner Baltimore and South sts.

DENTISTRY.

DENTISTRY.

DR. CASADAVANT, Surgeon Dentist, formerly from Paris and New York, returns hissi necre thanks to the citizens of Washington and Georgetown and vicinties for the liberal patronage which they have extended; it is since he has established himself in this city, and would inform them that he has removed to fame & Tucker's building, on Pounsylvania avenue, between the National Hotel and 4½ street, where he still continues to perform all operations in his profession in a superior manner, at New York prices, so as to enable all to test his skill, and he warrants his work to be equal to that of the best Dentists. As he manufactures his own artificial teeth, he is emblied to suit all cases, and will undertake to perform all those operations in which other Dentists have failed to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

Protection from Lightning. THE undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallunois Light 18 (1987). The superior Rods of Spiral-twisted, Carbonized Annealed Iron, with Zine Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in tensfeet lengths, with accurately-fitted brass-screw connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, patented.) forming a lock; the whole mounted with a solid platinum silver point. (patented,) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect sileut conductor ever presented to the public.

Rafety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods or CHARLES W. HEYDON.

CHARLES W. HEYDON. THE undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallusgist Light

CHARLES W. HEYDON.

Washington City.

I do hereby certify that I have app lied various powerful chemical reagents to Spratt's Patent Points for Lightning. Rods, and that the results of these experiments convince me that they will resk the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The reagents used in the above experiments were a solution of chloride of so dium, (common salt.) acetic acid, sulphuric acid, and hydrochloric acil. With the first, there was no action on the metal; with the several acids, there was no action on the metal; with the several acids, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.

UNIVERSITY of GA., October 8, 1850.

The Lightning Conductors of Mr. Spratt, offered to me, are well calculated to perform the office for which they are intended. Yours, truly,

Frof. ROBT. PETER.

LEXINGTON, Rr., February 20, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficare, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Augusta, (GA.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Issaining Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Folints, as promising, from the result of several lesis to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

A. MEANS,

Prof. Phys. Sec., Smory College, Ga., and Prof. Chem. and Pharm., Medical College. Ga.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city

very well devised; and, in point of mechanical construction, are the best I have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. SILIMAN, Jr.,

Prof. of Chem. in the University of Louisville.

LOUISVILLE, January 27, 1851.

A NOW FOR THE STATES

A BOOK FOR THE TIMES.

A BOOK FOR THE TIMES.

HELPS to a file of Holiness and Usefulness, or Caughey's Revival Miscellanies. The cemand for this book is almost unprecedented in the history of Methodist publications. Six thousand copies have been sold in about four months. The seventh thousand is now ready. Read these notices of its character:

"These sermons are admirably fitted for producing effect, immediate, powerful effect, upon the popular mind. Briof, hitting, bold, subjective; abounding in anecdote, illustration, patkes; never prosy, never halting for a moment in confident personsion that sinuers are to be converted by the truth they press home. \* \* \* We unhesitatingly recommend the circulation of this book. \*—Rev. Dr. Fightman, Ed. S. G. Advocate.

"It is a good work, and all that have bought it say so. One \* \* very good brother said, after reading the sermon on the 'Omnipotence of Paith,' that it gave him more of an insight of faith than anything he aver read or heard. A Saptist minister purchased a copy, and was carried away with the spirit of the work."—Rev. Theodore Hill, of the Anine Conference.

"I like Revival Miscellanies year much. It will do good."

'crence.

"I have read the book, and am not only delighted, but feel that I am a better man. All who have read it are greatly pleased."—Rev. T. Sullins, of the Holston Conference.

"This book has been a great bleasing to my soul. It has fired up my seal, and I feel like working for the Lord as I nover did before."—Rev. J. H. Montpomery, of Alabama.

"We shou!" hardly think it possible for any Christian to read this volume without partaking largely of that holy unction which breathes and burns on every page."—Rev. Richard Donkertley, of the Providence Conference.

aine Conference.
